What is your (approx.) elevation?

What are the average dates of the first and last frosts in your area?

What is the average high and low temperatures in your area during the growing season?

What is your total average rainfall and how much normally comes during the growing season?

Please describe your normal means of watering your garden (i.e., rains only, drip, hose) and how often you tend to water.

.

How would you classify your soils (sandy, loam, clay...)?

What, if anything, do you add to your soil (compost, manure tea, nitrogen fertilizer, etc.)?

What other plants/crops do you typically grow?

Have you grown NS/S crops before? Which ones?

Do you have a camera in order to provide photodocumentation?

If so, what type (e.g., digital, 35 mm)?

If not, are you willing to buy or otherwise gain access (e.g., borrow) to a camera for this project?
